

Since 1987

 www.constro.co  

Vision

We are passionate about construction and committed to completing every project safely, with top quality, and within the timeline.

Pandit Group is a first-generation business group founded by **Mr. Umesh Pandit** in **1980** in Thane, under the name **Skylark Constructions Pvt. Ltd.** Since its inception, the company has been engaged primarily in conventional civil contracting and has successfully executed numerous projects across Maharashtra and beyond.

In **1987**, **Mr. Ashwin Pandit**, the younger brother of Mr. Umesh Pandit, expanded the group's presence by establishing **Constro Enterprises**, a proprietorship firm based in Nashik.

Over the decades, the Pandit Group has built a strong reputation for quality and reliability in the construction sector, operating across **Maharashtra, Uttar Pradesh, and Goa**. Our portfolio includes **industrial structures, malls, hospitals, and automobile showrooms**, among other large-scale projects.

With the capability to execute works covering an area of approximately **20,000 square meters**, we have successfully managed **simultaneous projects** in **Nashik, Mumbai, Thane, and Goa**.

While our core strength lies in civil contracting, since **2020** we have evolved to offer **comprehensive design-build solutions** in response to our corporate clients' needs for a **single-window service provider**. Today, the Pandit Group undertakes complete project responsibility encompassing **Designing, Construction, MEP (Mechanical, Electrical & Plumbing)**, and **Project Management Consultancy (PMC)** — ensuring efficiency, accountability, and excellence at every stage.

Ashwin Pandit

CORPORATE PROFILE

We take pride in having successfully delivered numerous projects for a wide range of prestigious clients across diverse sectors, including:

- Automobile Service Stations
- Manufacturing Industry
- Warehouses
- Hospitality Industry
- Medical Facility Services
- Real Estate Development
- Dairy Industry
- Educational Institutions

At our core, we believe in providing complete, end-to-end construction solutions. Our “Design and Build” approach ensures that clients enjoy the convenience of a single-window system — from concept to completion — resulting in better coordination, faster delivery, and superior outcomes.

Our Commitment to Quality

The construction industry in India continues to rely significantly on traditional craftsmanship. While modern technology has enhanced efficiency, the industry remains a key source of employment for unskilled workers. Delivering top-quality results in such an environment requires expertise, experience, and dedication — qualities that define our team.

Through continuous improvement, innovation, and meticulous attention to detail, we consistently strive to exceed our clients' expectations. Our repeat clientele stands as a testament to our commitment to quality, reliability, and trust.

Our Philosophy

We believe that every project, regardless of scale, deserves the same level of precision and care. Our goal is not only to deliver excellence in construction but also to build lasting relationships founded on integrity, transparency, and performance.

Our clients are our greatest assets — and their continued trust inspires us to reach new heights in quality, service, and craftsmanship.

PLANNING, SCHEDULING & CONTROL

Effective planning and scheduling are at the heart of every successful project. At Constro, we believe that meticulous preparation, precise coordination, and proactive control are essential to deliver projects on time, within budget, and to the highest quality standards.

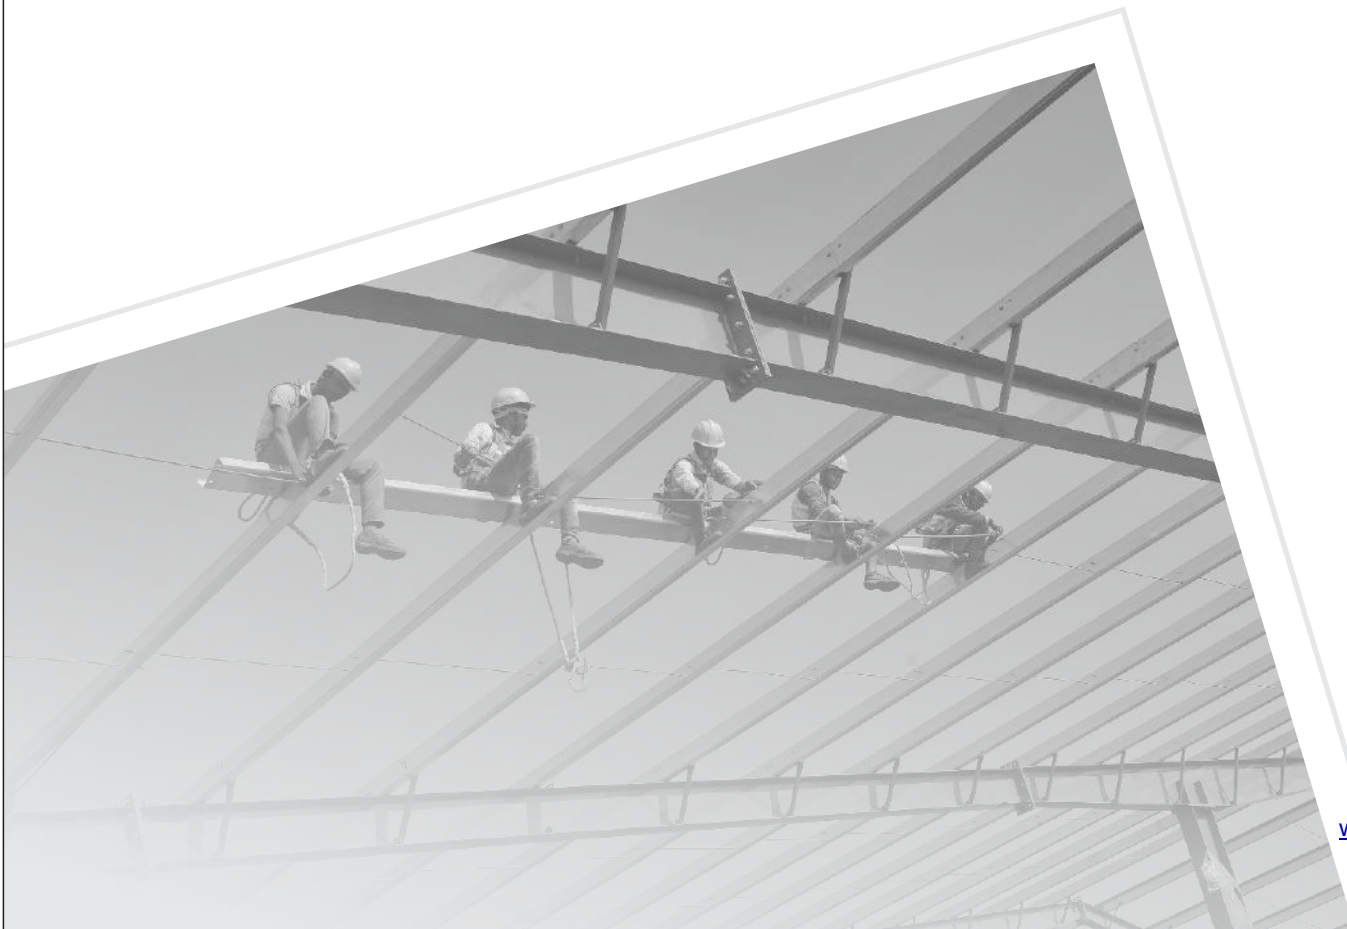

Our Approach

We believe in:

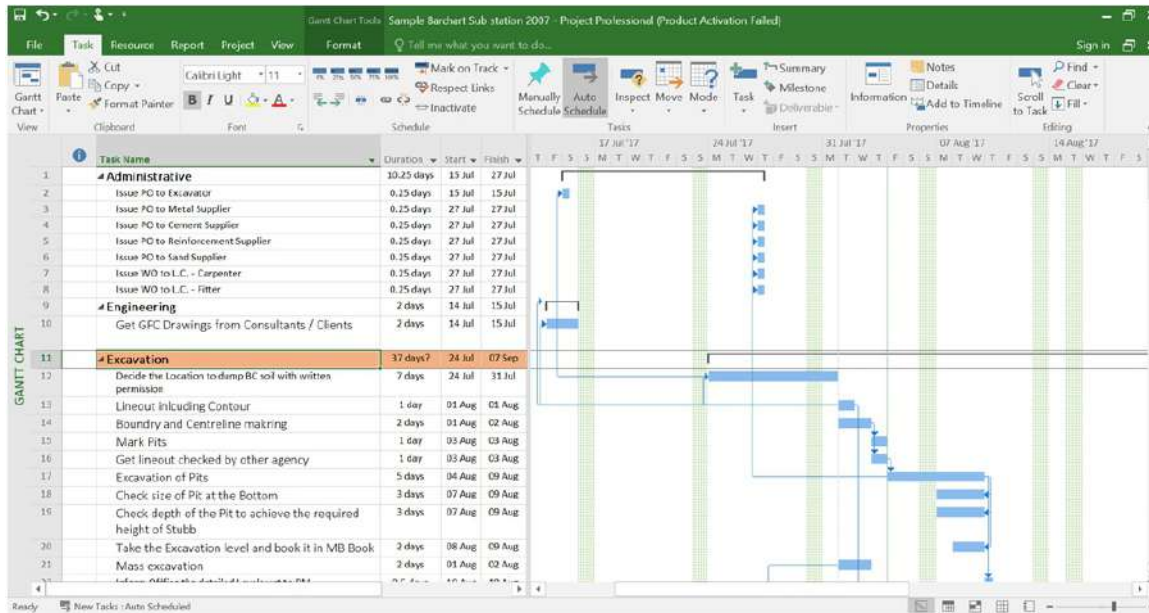

- Conducting thorough study and analysis of all project drawings before execution.
- Superimposing and coordinating various technical drawings to ensure seamless integration between disciplines.
- Collaborating closely with all stakeholders - including clients, consultants, and contractors - to ensure smooth communication and clarity of scope.
- Developing comprehensive project plans that serve as effective tools for Clients, Project Managers, and the Project Management Team.
- Utilizing Microsoft Project to create efficient, realistic, and trackable project schedules.
- Monitoring progress continuously and providing timely updates to clients and consultants.
- Implementing robust cost control mechanisms to track expenditures and prevent cost escalations.

Our Commitment

Through disciplined planning, rigorous monitoring, and responsive management, we ensure that every project progresses with precision — achieving the right balance between time, cost, and quality.

PLANNING & SCHEDULING (Bar Chart)

COMMITMENT ON- TIME AND ON-BUDGET

Delivering projects on schedule and within budget is the cornerstone of our reputation. We take pride in our ability to mobilize skilled manpower, implement efficient systems, and maintain exceptional quality — all while meeting critical project deadlines.

Our Strengths

- **Cost-Effective Manpower Solutions:**
We specialize in the efficient and timely deployment of skilled and unskilled labour across all trades, ensuring optimal workforce utilization.
- **In-House Workforce Database:**
Our comprehensive database and screening process enable us to source and assign the right personnel quickly and effectively.
- **Proven Brownfield Expertise:**
We have a strong performance record in executing complex brownfield projects, where precision, safety, and coordination are vital.
- **Robust Technical & Administrative Teams:**
Our dedicated engineering and management professionals ensure every project meets the highest standards of execution and accountability.
- **Best Practices in Execution:**
We adhere to industry best practices to ensure work is done right the first time — minimizing rework and maximizing efficiency.
- **Transparent Communication:**
Clear and consistent communication with the workforce ensures accurate reporting, timely decision-making, and smooth project progression.

Our Promise

We are committed to delivering every project on time, on budget, and with uncompromising quality, building lasting trust through performance.

Safety regulations followed:

A. First Aid

We arrange adequate facilities for first aid and medical treatment for our staff and workers engaged on the work site and are of adequate size confirming to requirements of the place where the job is executed.

B. Personal protective measures:

The identification of personal protective measures is based upon the risk assessment of jobs. But minimum facilities ensured are:

- A protective helmet, as well as safety shoes.
- Safety belts for the workers working on heights above 1.8m.
- Goggles whenever there is a danger of eyes being struck by powders, splinters, sparks.
- Gloves for persons handling materials where there is risk of injury to hands and wrists.

C. Housekeeping:

As Housekeeping gives the first impression of how a site is organised, a programme for housekeeping and waste disposal from site is established. Basic rules followed include:

- Allocation of separate areas for storage of construction material.
- All access ways are kept clear from debris including scaffold access.
- Considering safety material is stacked up to a height of 1 meter.
- Store area is well defined and maintained.

D. Working at night/ after sunset:

Working at night or after sunset is carried out only after approval from the Clients.

E. Temporary installation on site:

Installation even though temporary, is constructed in a rational and proper way, in observance of standards of safety and work hygiene.

- Defined Process
- Constant Supervising
- On Going Training
- Importance of Safety to Family Member
- Stop & Think Risk Assessment
- Pre Start Meetings with Each Section
- Safety Audit
- Strong H. R. Policies

SAFETY FIRST

F. Excavation into the ground:

All excavations are hazardous because they are inherently unstable. Before beginning excavation in the areas where the presence of underground pipes and cables are in operation a special permission is procured from the client regarding the same. All excavations are carried out in accordance with the following safety procedure:

- Before excavation starts excavation work is planned and the method of excavation and other support systems are decided.
- Existing services are fenced, hung up or protected.
- Possible effects on the adjacent structures are checked.
- Plan for uninterrupted traffic follow is decided.
- Provide safe access & egress into and out of the excavations.
- Our site in-charge makes a daily inspection of excavation and areas around them before work starts.

G. Working at height:

We provide rigid and safe working platforms, walkways or access when working at elevated locations above ground level, or where a fall resulting in injury is possible or when working in locations below ground level. Platforms and walkways are kept free from obstacles, such as materials, equipment, tools and rubbish etc, All these might fall or obstruct safe working activities. When working during night or in dark locations, working platforms and access ways are provided with adequate lighting.

H. Barricading:

Caution red and white tapes with high visibility are used to segregate the potentially hazardous areas. These tapes are used for indicative entry protection in to excavated areas, scrap yards, shallow pits. The caution tape is stretched at two levels at a distance of 2ft from the ground level.

COMPANY ASSETS

Machinery & Equipments

Concrete Pump (with 125 mtr. Pipeline)	01 No.	Containers for Material Storage (Cement Godown& Special Equipment)	06 No.
Concrete Mixer (Full Bag)	04 No.	Portable Office Cabin	02 No.
Compactor	03 No.	Mechanical Lift (Including framework)	01 No.
5 HP Water Pump	03 No.	Concrete Breakers	05 No.
Genset	01 No.	Total Station	01 No.
Theodolite	21 No.		
Wheel barrows	25 No.		
Mini Crane	03 No.		
Concrete Mixer (Half Bag)	03 No.		
Needle Vibrator	10 No.		
1HP Water Pump	08 No.		
Auto Level	04 No.		

Formwork Material: (Props, Acrospans, Centering Plates, Platform and other accessories) Capacity to cast 40,000 sft slab at a time.

SERVICES

Various services offered by PANDIT GROUP ® as follows;

General Contracting : Construction execution along with usage of proper methodology of construction, quality control, reporting, preparing schedules & tracking activities, delivering the product with tender specifications in time and within budget.

Turnkey Projects : This type of project delivery involves understanding client's requirement and defining the scope of project, primary costing & budgeting, pre-construction planning & preparing primary designs (Structural, Architectural, Utilities etc.) , executing the construction phase including quality control, tracking project activities and delivering the product, initial testing & startup.

Structural Repairs & Maintenance : Experienced professionals and craftsmen are skilled in a wide range of concrete repair services, including:

- Structural & Non-Structural Cast-In-Place Concrete Repair
- Post-Tensioned Concrete Repair
- Precast Concrete Repair
- Equipment & Pump Foundation Repair

CONTRIBUTION TO SOCIETY

We Believe, that education gives ability to think beyond conventional way. It guides you to travel on path you have chosen .

The unskilled labour has been deprived of education for various reasons. We are trying to develop skills in them so that they earn more respect and money. This will make them able to provide education to their children. We Strongly promote education to these under privileged children of our unskilled labour.

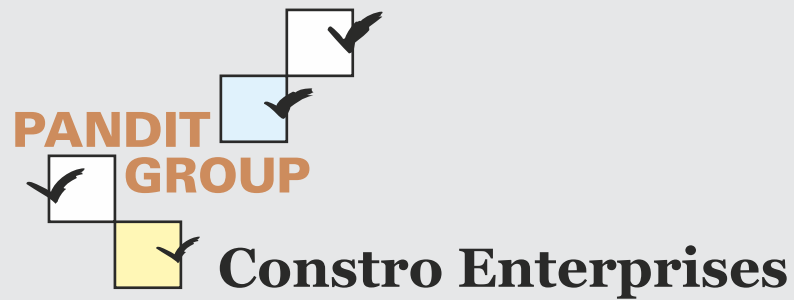

GO GREEN

We belong to industry which causes environmental hazards but Infrastructure is only way to progress.

We emphasise on each and every one to protect our mother land. We support this activity in various ways, one of the strong mode is "Tree Plantation" . We also suggest the designer and clients to use environment friendly material.
